PROFESSIONAL SUMMARY

Full-Stack Web Developer with 5 years of experience building SaaS platforms, ERPs and charity systems with Laravel, Filament, Livewire, Vue.js and React. Sole or lead developer on 10+ production systems, including a WhatsApp API platform, an Arabic ERP, and charity systems with bank integration. Experienced with payment and shipping integrations, AI features and real-time data. Author of open-source Filament plugins with 17,000+ installs. Most of my work is Arabic-first and bilingual.

WORK EXPERIENCE

Full-Stack Web Developer

Ebdaa-Al-Reada, Sana'a, Yemen **March 2024 – Present**

- **Ecosail** (ecosail.net) — lead developer of a B2B platform for importing from China, with panels for the team, clients and consultants: Stripe payments for subscriptions, consultations and orders, a CRM and sales pipeline, order chat, WhatsApp notifications and two-factor login
- **CoraLive** — built the match data sync from SportMonks, a predictions game with private leagues and leaderboards, and real-time chat and stories for a football app backend
- **6amMart marketplace** — added AI product import from vendors' Facebook and Instagram pages, paid through the vendor wallet, and Next.js storefront templates for each store
- **RI-BU** (ri-bu.com) — built the events and invitations part of the platform: event creation with approvals, guest QR codes with a check-in screen, and matching CVs to job requirements
- Sole developer of bilingual (Arabic/English) Filament websites for Al-Aqel Hospital (alaqel.hospital.ye), Riyada Media, Green Organization and Riada Soft

Full-Stack Web Developer (Part-time / Contract)

Ramz-Al-Etqan, Sana'a, Yemen **January 2023 – Present**

- **Esaad** — main developer of a beneficiary and aid management system for a Saudi charity, with bank integration for transfers and payments, and Gemini for reading uploaded documents; moved it from Livewire to Filament as it grew
- **Irqah** — sole developer of a case-management SaaS for charities, where each charity has its own domain, plan and workflow, and Gemini suggests values from uploaded documents for staff to confirm
- **Hayawi** — sole developer of a platform that connects charities with suppliers and service providers, with a panel for each role and an API for the mobile app
- **Koora Live** — improved live-score updates and overall performance of the football backend while staying within the SportMonks API limits
- **Sahl** (sahl.io) — built the Qiyas student app in Vue 3 and TypeScript, one sign-in across Sahl's subdomains with social login, and curriculum management with YouTube sync in the admin panel
- Built Al-Nafeesah's content system and API with editor tools for Quran verses, hadith and footnotes, and the Taafi consultation booking system (Laravel, Inertia, Vue 3)

Freelance Full-Stack Web Developer

Self-Employed **January 2022 – Present**

- **WhatsDev** (whats.youdev.online) — built and run a WhatsApp API platform for businesses: number connection, campaigns, webhooks, plans with usage limits, a chatbot that answers from the business's documents, and PHP and TypeScript SDKs
- **You ERP** — Arabic ERP for Saudi and Gulf businesses with accounting, financial reports, sales, purchasing and inventory; each company has its own database, and an Android version works offline
- **AlQasr Glass** (alqasrglassco.com) — quotation platform for a Saudi glass manufacturer: quote requests with drawings, Arabic PDF quotations with VAT, and a customer portal with WhatsApp login
- **Tafsir Ahlami** (tafsirahlamy.com) — Arabic dream-interpretation encyclopedia: content managed in Laravel and Filament with help from Gemini, Meilisearch search, and an Astro site on Cloudflare Pages

- Integrated DHL Express, Aramex, Stripe, Tamara, PayPal and Meta Pixel into the **Mall by Shams** e-commerce backend, and developed **OrahToGo**'s B2B wholesale module (supplier payments, delivery codes and notifications)
- Built the Nahawand and Zafat song stores with Moyasar, Tabby and Tamara payments

Earlier Experience

- **Web Designer**, ProSite, Sana'a (May 2022 – Nov 2022) — responsive websites in HTML5, CSS3 and Bootstrap for 5+ clients, improving page load speed by 25%
- **Web System Designer**, Ministry of Justice, Sana'a (Nov 2021 – Sep 2022) — web interfaces for government workflow digitization used by 50+ staff
- **Sales Representative & Designer** (part-time), Top Vet Company, Sana'a (2020 – 2022) — marketing materials in Photoshop and Illustrator

OPEN SOURCE

- **filament-modal-repeater** — 13,800+ installs, ★18, listed in the official Filament plugin directory. A repeater that shows items in a table and edits them in a modal
- **filament-autosave** — 2,900+ installs, listed in the official Filament plugin directory. Autosave, drafts and undo for Filament forms
- **filament-smart-fill** — fills Filament forms from a PDF, image or text with AI, and lets the user review each value first
- **laravel-feedback-board** — in-app feedback widget for Laravel with screenshots and a Kanban board
- **filament-floating-labels** — floating labels for Filament form fields
